## Skills

| Skill | Rating |
|---|---|
| Python Programming | ★★★★★ |
| Object-oriented programming | ★★★☆☆ |
| C programming | ★★★☆☆ |
| JavaScript, React JS | ★★★★☆ |
| HTML5 & CSS | ★★★★★ |
| Typescript | ★★★★☆ |
| NextJs | ★★★★☆ |
| Data Structures | ★★★☆☆ |
| Bash Scripting | ★★★★☆ |
| Knowledge of VCS - Git | ★★★★☆ |
| SQL Database Management | ★★☆☆☆ |
| Linux as a Working Environment | ★★★★☆ |
| Technical writing and documentation | ★★★★☆ |
| Communication | ★★★★★ |
| Teamwork | ★★★★★ |
| Problem-Solving | ★★★★☆ |

## Languages

| Language | Rating |
|---|---|
| English | ★★★★★ |

Experienced Full-stack software developer with over three years of experience in the area of computer programming. I build websites that run on the web on the web and I am passionate about utilizing new technologies to make better user experience. I thrive in collaborative environments and love working on projects that challenge me to learn new technologies and techniques. I am highly motivated to provide legendary service to customers and teammates, as well as encourage thought of new possibilities.

## Work History

**2023-09 - present**

### Fullstack Developer

*Japatalent , Abuja*

- Assisted in developing a web-based application using Nextjs and Typescript framework.
- Collaborated with senior developers to improve application performance and user experience.
- Implemented RESTful APIs and integrated third-party APIs for data retrieval and processing.
- Ensured data consistency and integrity by implementing transactions and validations using Prisma in conjunction with MongoDB.
- Collaborated with cross-functional teams in an Agile environment, playing a key role in planning, execution, and delievery of complex projects, consistently meeting deadlines and exceeding performance targets.

**2022-02 - 2023**

### Freelance, Fullstack developer

*Freelance, Remote*

- Developed full-stack applications using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Designed and implemented RESTful APIs for seamless communication between front-end and back-end components.
- Implemented authentication and authorization mechanisms to ensure secure access to application resources.
- Employed Express.js to handle server-side logic and middleware, enhancing application functionality.
- Utilized MongoDB for efficient data storage and management, ensuring scalability and performance.
- Implemented authentication and authorization mechanisms to ensure secure access to application resources.

## Education

**2023-06 - 2023-10**

### ALX Software Engineering Training Program

*Remote*

ALX Software Engineering Training Program

The ALX Software Engineering Degree is a rigorous one-year training program designed to equip aspiring software engineers with foundational skills and practical knowledge essential for launching a successful career in the field. The program focuses on cultivating problem-solving abilities, critical thinking skills, and proficiency in relevant tools and technologies.

**2022-12 - present**

### The Complete 2023 Web Development Bootcamp, Web Development

*Udemy, Online*

Instructor: Dr. Angela Yu

Under the mentorship of Dr. Angela Yu, I embarked on a transformative

journey to become a Full-Stack Web Developer through her comprehensive course. Dr. Yu's guidance and expertise facilitated a seamless transition from novice to proficient developer, covering essential technologies and frameworks necessary for modern web development.

**2022-04 - present**

### 100 Days of Code, Python Software Development

*Udemy, Online*

- **Python Mastery**: Under Dr. Angela Yu's expert guidance, attained proficiency in Python from basics to advanced levels, covering data types, control flow, functions, and object-oriented programming.
- **Project-Based Learning:** Emphasized practical application through building games, APIs, and self-directed projects, fostering hands-on experience.
- **Problem-Solving Methodologies:** Learned effective problem-solving strategies, including breaking down complex problems, creating pseudocode, and implementing solutions through coding.
- **Tech Stack Focus:** Primarily focused on Python, equipped with skills for problem breakdown, pseudocode creation, flowchart development, and coding implementation.
  Achievements: Mastered Python, analyzed code intricacies, built diverse projects, and developed robust problem-solving skills essential for software development success under Dr. Yu's mentorship.
